Restriction/Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-11, 20-30, and 39-49; drawn to a computer implemented method, system, and computer software product for characterizing a plurality of biological sequences, classified in class 702, subclasses 19.
- II. Claims 12-19, 31-38, and 50-57; drawn to a computer implemented method, system, and computer software product for gene characterization, classified in class 702, subclass 19

The inventions are distinct, each from the other because:

The inventions Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04, M.P.E.P. § 808.01). In the instant case the different inventions directed to products and methods having different functions, different effects, and different modes of operations. The function(s)/mode of operation of Group I is to obtain models, determine the fitness of sequences to the models, and classifying the sequences according to distances to the models. Whereas the function(s)/mode of operation of Group II is to generate libraries of models, inputting protein sequences, comparing protein sequences to the models, establishing a criteria, and assigning sequences to models based upon the criteria. Thus, Group I and II have different functions, different effects, and different modes of operation.

Art Unit: 1631

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and the search for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicants are advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

OBJECTION BY DRAFTSMAN

Applicants are hereby notified that the required timing for correction of drawings has changed. See the last 6 lines on the sheet, which is attached, entitled "Attachment for PTO-948 (Rev. 03/01 or earlier)". Due to the above notification Applicants are required to submit drawing corrections with the time period set for responding to this Office action. Failure to respond to this requirement may result in abandonment of the instant application or a notice of a failure to fully respond to this Office action.

INVENTORSHIP AMENDMENT

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. §1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).

Art Unit: 1631

ORAL ELECTION

A telephone message was left for Joe Liebeschuetz on 14 October 2003 to request an oral election to the above restriction requirement, but did not result in an election being made (no response received).

EXAMINER INFORMATION

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1.
